**Network Activity Recording and Monitoring Software**

---

SystemWATCH is a powerful software that allows you to operate, view, live, record and replay the recording of activities of all the computers, in the network on your monitor at a time, SystemWATCH is an activity monitoring software that records all software applications and programs opened and used, keystroke typed, website visited, documents and letter opened - created – modified, internet used, emails received and sent, porn and other illegal website visited and all other activities.

SystemWATCH is a network activity recording and monitoring software that records and monitors all the activities immediately. And prepares the detailed reports. SystemWATCH is based on Client-Server architecture.

SystemWATCH is the only software available of its kind which is to be installed on server and all clients / nodes can be monitored without informing people working on clients / nodes. People working on clients / nodes will NEVER come to know that SystemWATCH is installed and watching them and their activities all the time. The client / node runs completely hidden and cannot be detected / terminated or uninstalled. Server can control and monitor all clients / nodes at a time. When user types any keystrokes on his PC, this text appears on your screen in live mode. Text may include email, chat conversations, documents, passwords, website visited etc.

You can block objectionable websites by applying keywords like facebook, twitter, violence, porn, war etc. Keyword contained websites will never be opened by your staff members.

## Advantages of SystemWATCH

- Keep watch on your staff working on computers. SystemWATCH records their activities in form of movie and screen-shots. You will be able to check their activities later on your personal computer / server. Your staff will NEVER come to know that SystemWATCH is installed and watching them all the times.
- Watch LIVE activities of four or more workstations / nodes at a time without informing people working on those workstations / nodes.
- Every screen shots, every key pressed can be stored in a tiny sized file on your server. You can select a particular client / node and watch activities in your free time.
- Stop your staff watching adult, porn, violent, and other illegal website.
- Control your staff doing their personal work in office hours.
- You can block and allow desired website and webpage on all / any workstations / node.
- Send instant messages from your server to all workstations in a fractions of seconds.
- SystemWATCH Records letters, passwords, emails, internet chats done by your employees on your personal server. Control them and increase your business productivity.
- Monitor multiple employee computers simultaneously from a single workstation.
- Protect proprietary & confidential information. Identify and eliminate all types of computer misuse.
- Eliminate frauds in your company.
- Ensure proper use of manpower, hardware & software resources
- View captured keystrokes / programs / webpage / screen-shots.
- Run silently at startup.
- Auto-capture at startup.

## List of IP Address & Host Name

Here you will get list of all computers connected with your server. Select one computer by clicking on square and have a look at live activities, recorded activities, visited website, chats, emails, letters, documentation and all other things without informing operator working on that computer (node).

The screenshot displays the SystemWatch Professional Edition interface. On the left, there is a grid of 20 monitoring tools including Equalizer, Network Analyzer, Keylogger, Webcam, Webcam Recorder, Webcam Recorder (Direct), Webcam Recorder (Direct), Webcam Recorder (Direct), Active Mail, System Info, Performance, Remote Data, Local Storage Monitor, IP Scanner, Area Monitoring, Webcam Monitor, File Lock, File Lock, File Lock, and All Reports. Below the grid are configuration options for the selected tool, including 'Item to monitor by instance' (set to CPU), 'Auto Update from library' (set to Auto (Default: no)), and 'Do not record activities of this server, as I am Director/ Administrator of my company'. There are also buttons for 'Spin Box Settings', 'Change Login Password', and 'Uninstall Management'. On the right, a table titled 'You are watching activities of: 192.168.1.103 (Server)' shows a list of connections. Below the table are buttons for 'Show all HTML Register' and 'Delete all HTML Register'. At the bottom, there is a 'Control Center' section with icons for 'Web Server Security', 'Web Client Activity', 'Web Server Control', and 'Web & Content Explorer'.

Id	Idc Name	Idc Created Date/Time	Status
1	ADMIN@-L-1-10	20-10-2011 12:16:30	Created
2	ADMIN@-2-1-10	20-10-2011 12:16:30	Created
3	MANAGE@-L-1-10	20-10-2011 12:16:30	Created
4	MANAGE@-2-1-10	20-10-2011 12:16:30	Created

## Record Screen-Shots

Checkmark this option. This will record all activities in the form of snapshots in a single page without informing operator working on selected computer. Screen-shots can be recorded and stores in a small file (date wise and time wise). You can have a look later or in your free time. You can mention time for each screen-shot to be recorded right from 1 second.

## Record Website Visited

Checkmark here will record all website and webpage visited without informing operator working on selected computer. You can easily control your staff and operators watching adult, porn and other objectionable website and webpage.

## Record Key Pressed & Application Log

Checkmark here will record all text typed and key pressed. You can watch recorded chats, e mails received and sent, documents opened and created, software used, applications used without informing your staff and operator LIVE or in your free time.

## Blocked Website

Great solution to stop your staff and operators watching adult, porn and other objectionable website and webpage, supply a keyword like porn, sex, violence, piracy, war, wrestling, games etc. Your staff and operators will never be able to open website and webpages containing those keywords. You can also block entire website using this option.

## Allowed Website

If you wish that your staff and operators should open certain website only which are related with your business, this is the best solution for you. Just enter website addresses here like rediff, yahoo, hotmail, tellsell etc. Your staff and operators will never be able to open any other website and webpage.

## Server Setting

System<sup>MATCH</sup> is the software to record network activities of each workstations / nodes / clients without informing people using those computers. This option is useful to activate System<sup>MATCH</sup> as it's a confidential software. You can select certain key combination here to start the software.

## Reports (Snap-Shots)

Get the list of snapshot files (date wise and time wise) recorded in your server for the selected computer. You can click VIEW REPORT to view a particular snapshot file. You can have unlimited screen-shots in a single file.

## **Reports (Key Pressed & Application log)**

Get the reports of text typed and key pressed by your staff and computer operators (date wise and time wise). Great solution, you can watch letter and document typed, emails sent and received, chat conversation, application & software used and all other activities done by your staff without informing them.

## **Reports (Website Visited)**

Get report of website and webpage used (date wise & time wise). Your staff and operator will never watch adult, porn and other objectionable website now. SystemWATCH is watching them all the times without informing them.

## **Create Movies of Activities**

Another fantastic feature! Make a movie file of snapshots recorded, text typed and key pressed and website used, documents used, applications used, software used. You can save those files in your server and watch in your free time.

## **Send Instant Messages**

Send instant messages from your server to all workstations in a fraction of a second.

## **Live View of Clients Desktops / Nodes**

The most powerful and highly required option. You can watch activities of FOUR or more workstations / nodes LIVE on your server without informing staff and operators. This option will divide your server monitor screen into four or more different workstations / nodes on the same screen of your computer / server at a time.

## Hide SystemWATCH

SystemWATCH starts in background of your computer while you start the computer. This option will hide SystemWATCH and record activities without informing your staff and operators.

## Terminate SystemWATCH

This option will terminate recording and other functions of SystemWATCH until you start your computer again.

## ABOUT FREE SELF RUNNING TRAINING KIT

This will teach you operation of SystemWATCH in depth. Just sit back, relax and watch two hour live show of operation. This will inform you how to use SystemWATCH more efficiently. Latest technology in Indian IT industry. No problem incase your operator leaves your company, trainer is always with you. This training kit is absolutely free with SystemWATCH.
