

## TimeTrack - Professional Attendance & Payroll Software

*TimeTrack* is a highly user definable attendance & payroll application which allows the users to set policies according to their organization's rules. With over 5 years of experience and 1000+ installations our software has all the features to satisfy your requirements.

### One edition – Premier Edition

We have only ONE edition – the premier edition which contains all the features available in the software. There are no standard & sub-standard editions with some missing features. There is an optional web-based Employee Self-service module and a SAAS module which can be opted by users. With our 5 years of experience, our attendance software is a highly flexible package that will fulfill even the most demanding rules and regulations of companies. **An example would be our Shift Time menu which has over 20+ optional parameters which can be user configured.**

### Payroll Fully Integrated with Attendance (optional)

Since our payroll, is highly integrated with our Attendance System all attendance related components like late come, absence, overtime can be fine tuned to a greater extent. We believe the each customer's needs are unique and that philosophy would be reflected in our design. Our Report Planner / Letter Planner designers can provide you the exact report needed by you in the format you decide.

*Our Standard Reports added to the Report / Letter Planner & the SQL Query Planner provides a full gamut of information to the users on what all they need from an Attendance / Payroll Application.*
